Summary

Software engineer with about 10 years of experience, focused on web application development. Comfortable across the stack from backend services to cloud infrastructure, and an advocate for code review and test automation.

Skills

- Backend development in Go and TypeScript (API design and implementation)
- Cloud infrastructure design and operation on AWS
- CI/CD pipelines and test automation
- Driving code and design reviews within a team

Experience

CloudTech Inc. Apr 2020 - Present

Backend Engineer

Backend development and operation of a SaaS product.

- **Business management SaaS API (Apr 2020 - Present)**

Backend (team of 5)

Designed and built REST APIs in Go and operated the AWS infrastructure, improving availability and performance.

Tech: Go, AWS, PostgreSQL, Terraform

SampleSoft Co., Ltd. Apr 2015 - Mar 2020

Software Engineer

Web application development for client projects.

- **E-commerce site development and maintenance (Apr 2015 - Mar 2020)**

Full-stack

Owned the full cycle from requirements to implementation, testing, and release.

Tech: TypeScript, Node.js, MySQL

Education

2011 4 B.Eng. in Information Engineering, Mihon Institute of Technology

2015 3 Graduated, Mihon Institute of Technology

Certifications

- AWS Certified Solutions Architect – Associate
- Applied Information Technology Engineer (Japan)

Publications

- Authored several internal engineering blog posts on backend design

- Speaker at internal study sessions (test automation, cloud design)
