

Taro Mihon

taro.mihon@example.com · +81 90-1234-5678 · Tokyo, Japan

Summary

Mobile application engineer with about 12 years of experience across iOS and Android. Starting in game client development and moving through contract and in-house work, I now lead mobile development as a tech lead on an app with several million monthly users.

My strengths span performance tuning, architecture, CI/CD, and growing the team through hiring and mentoring.

Skills

- Native iOS and Android development in Swift and Kotlin
- Cross-platform development with Flutter
- Mobile performance tuning (startup)
- Mobile CI/CD and test automation with Fastlane and Bitrise
- App growth (A/B testing)
- Mobile team tech lead

Experience

Mihon Mobile Inc.

Apr 2020 - Present

Mobile Tech Lead

Lead mobile development of an app with several million monthly users as tech lead.

- **Super app development and growth (Apr 2020 - Present)**

Tech lead (mobile team of 8)

Tech: Flutter / Swift / Kotlin / Firebase

Led the design and implementation of an app combining Flutter and native code. Improved the crash-free rate to 99.9% and cut startup time by 40%, and built an A/B testing foundation that steadily improved key KPIs.

- **Native payment integration (Jul 2021 - Mar 2022)**

Design and implementation lead

Tech: Swift / Kotlin / StoreKit

Integrated a payment SDK natively into both iOS and Android, organized the security requirements, and greatly reduced post-release payment errors.

- **Mobile CI/CD platform rebuild (Apr 2022 - Present)**

Platform owner

Tech: Fastlane / Bitrise / GitHub Actions

Automated build, distribution and testing with Fastlane and Bitrise, streamlined a manual release process, and raised the release cadence from monthly to weekly.

Mihon App Co.

Apr 2016 - Mar 2020

iOS / Android Engineer

Owned several contract and in-house apps from design through operation.

- **Marketplace app from scratch (Apr 2016 - Mar 2018)**

iOS / Android (team of 4)

Tech: Swift / Kotlin / Realm

Built a marketplace app from scratch in Swift and Kotlin; it passed one million downloads after launch and ran reliably in production.

- **Video streaming app performance (Apr 2018 - Jun 2019)**

Performance lead

Tech: Swift / AVFoundation / ExoPlayer

Cut time-to-first-frame by 50% and reduced memory use, profiling to find bottlenecks and optimizing rendering and caching.

- **Shared UI component library (Jul 2019 - Mar 2020)**

Design and implementation

Tech: Swift / Kotlin

Built a reusable UI component library shared across apps, speeding up the implementation of new screens.

Mihon Games Inc.

Apr 2013 - Mar 2016

Game Client Engineer

Client development for smartphone games.

- **Smartphone RPG client (Apr 2013 - Mar 2015)**

Client

Tech: Unity / C#

Developed a smartphone RPG client in Unity / C#, optimizing rendering so it ran smoothly even on low-end devices.

- **Real-time multiplayer (Apr 2015 - Mar 2016)**

Client

Tech: Unity / C#

Implemented real-time multiplayer on the client, mitigating network latency to deliver a smooth match experience.

Education

2009 4	Entered Mihon Institute of Technology, B.Eng. in Information Engineering
2013 3	Graduated, Mihon Institute of Technology

Certifications

- AWS Certified Solutions Architect – Associate
- Google Associate Android Developer
- Applied Information Technology Engineer (Japan)
- TOEIC 880

Publications

- Spoke on mobile app performance at a mobile conference
- Authored blog posts on mobile architecture
